Journal of The Electrochemical Society

Volume 140 — 1993

Author and Title Index

and

Subject Index

Using the Indices

Only Letters, Technical Papers, and Review Papers are included in the indices, and titles have been limited to ASCII text. Thus, superscripts and subscripts are not differentiated from ordinary characters, and Greek letters and symbols are spelled out, replaced, or, in some cases, omitted.

In the Author and Title Index, first authors are listed with any coauthors, the issue and page numbers, and the title. All other authors are listed with a reference to the first author and the issue and page number.

In the Subject Index, all the words that have been judged not insignificant in the title are indexed and shown in their context, together with the issue and page numbers.
